PROFILE

Finance and risk-analytics specialist in training, combining a strong commercial mindset with hands-on data engineering. Builds financial analytics and reconciliation systems that track deal profitability, margin leakage, FX exposure, and internal-control integrity across the transaction lifecycle. Adept at anomaly detection, loss prevention, and compliance-driven reporting. Seeking a 6-month full-time internship in Financial Analysis, Commercial Finance, RegTech / Regulatory Reporting, or Risk Management.

EDUCATION

Universite catholique de Louvain (UCLouvain), Louvain-la-Neuve, Belgium Sep 2025 - Jul 2027

Master's, Data Science

Relevant coursework: Business Ethics and Compliance Management, Machine Learning, Statistics.

Karpagam College of Engineering, Coimbatore, India Sep 2021 - May 2025

B.E. CS & Design, 81.9%

CERTIFICATIONS

- Forensic Accounting and Fraud Examination, West Virginia Univ. (Coursera), Jul 2026
- Financial Accounting Fundamentals, Univ. of Virginia, Darden (Coursera), Jul 2026
- Foundations: Data, Data, Everywhere, Google (Coursera), Mar 2026

PROJECTS

RevenU - Deal Lifecycle & Profitability Intelligence Platform

github.com/Ranjith-Prasath/revenU

End-to-end financial analytics platform tracking deals from quote to payment - revenue, cost, margin erosion, FX exposure, and transfer pricing.

- Engineered real-time margin-leakage detection across SKUs and customers, surfacing profit-recovery opportunities for finance controllers.
- Delivered automated P&L-style reporting, audit trails, and CFO dashboards for commercial-finance and FP&A decisions.
- Applied Monte Carlo simulation and cost-of-inaction modelling to quantify financial risk and recommend recovery strategies.

Margin Recon Engine - Enterprise Reconciliation & Internal Controls

github.com/Ranjith-Prasath/revenU

Rule and fuzzy-matching reconciliation engine across 10 domains (AR, AP, Bank, GL, SO/PO, Intercompany, Tax, Treasury, Revenue, Inventory); stress-tested across 21 domain scenarios.

- Achieved 93% auto-match rate on 50K real invoices and 92.7% on 69K bank entries.
- Managed exceptions review workflow (accept, reject, escalate, write-off) with audit trails and confidence-labelled exports for compliance and controls.
- Ran 500K-row stress tests with a Python generator; supports forecasting and loss-prevention analytics.

PROFESSIONAL EXPERIENCE

Digital Marketing Executive Intern, Virtuospark Technologies Pvt Ltd Aug 2024 - Apr 2025

- Built weekly and monthly P&L-style dashboards in Excel tracking revenue, ROI, and KPIs across multiple channels.
- Ran A/B testing to optimise budget allocation and channel mix, improving margin efficiency; reconciled campaign spend with audit trail.

SEO Analyst Intern, DOT Mappers IT Pvt Ltd Jan 2024 - Jul 2024

- Analysed 700+ landing pages to identify portfolio-mix opportunities, linking operational metrics to commercial outcomes with variance analysis.

FINANCIAL ANALYTICAL SKILLS

Financial Intelligence:	Margin and leakage analysis, P&L interpretation, FP&A, working capital, DSO, variance analysis, deal-lifecycle tracking.
Risk and Controls:	Forensic accounting, fraud examination, reconciliation controls, audit trails, internal controls, regulatory reporting.
Analytics Methods:	Monte Carlo simulation, cost-of-inaction modelling, A/B testing, statistical analysis.
Data Tools:	Excel (advanced), Power BI, SQL / PostgreSQL, Python (pandas, numpy), dashboard design, Docker.
Languages:	English (fluent, IELTS 7), French (A2), Tamil (native).
